MINERAL WALL PLASTER

Crustal

Forty-one mineral shades.

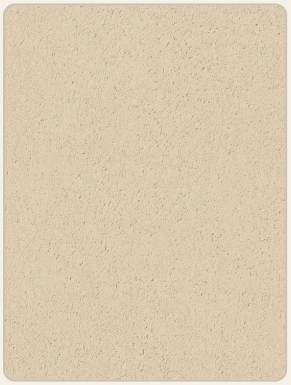

Pigmented throughout and mixed on site — a curated palette from ivory and linen to basalt and carbon. Custom colors on request.

FINISHES

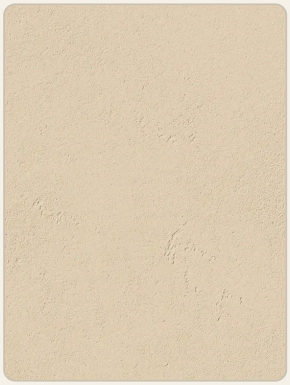

One finish, many hands.

The same powder becomes a family of surfaces — smooth and chalky, finely mineral, coarsely textured, or combed like timber.

Smooth

A soft, chalky matt — quiet and even.

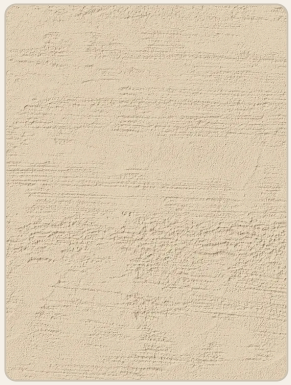

Mineral

A fine mineral grain with natural depth.

Textured

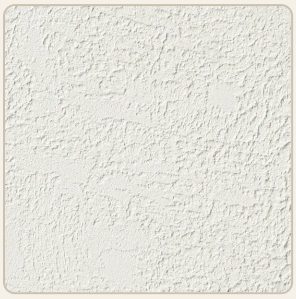

A coarser, raw and tactile surface.

Timber

A combed, directional, wood-like movement.

Hand-applied finishes; the final texture depends on the craftsman, the substrate and the light.
